Project Initialization and Planning Phase

Date	15 March 2024
Team ID	SWTID-2026-4536
Project Title	LegalEase - AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to simplify legal document creation using Generative AI, improving accessibility, efficiency, and document preparation. It tackles the difficulties of complex legal language, time-consuming manual preparation, and lack of legal knowledge, promising easier document generation and better user experience. Key features include an AI-powered legal document generation system, editable document preview, professional formatting, and multi-format document export.

Project Overview

Objective
The primary objective is to simplify the creation of legal documents by implementing Generative AI techniques, ensuring faster, customizable, and professionally formatted legal document generation.

Scope
The project comprehensively supports the creation of legal documents such as employment contracts, lease agreements, NDAs, and other agreements, incorporating AI for a more accessible and efficient document generation system.

Problem Statement

Description
Addressing the difficulties and inefficiencies in the current legal document preparation process, where users may struggle with complex legal language, manual document creation, formatting, and lack of legal knowledge.

Impact
Solving these issues will result in improved accessibility, reduced document preparation time, easier customization, and an overall enhancement in the legal document generation process, helping users create professional documents without requiring a legal background.

Proposed Solution

Approach
Employing Generative AI techniques to analyze user-provided information and generate structured legal documents, creating a customizable and efficient legal document generation system.

Key Features

- Implementation of an AI-powered legal document generation system.
- Editable preview of generated legal documents.
- Support for generating employment contracts, NDAs, lease agreements, and other agreements.
- Professional formatting with logos, headings, tables, and footers.
- Download and export documents in `.txt`, `.docx`, and `.pdf` formats.
- User inputs including document type, parties, terms, and effective dates.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware	Computing Resources	CPU/GPU specifications, number of cores
	Memory	RAM specifications – 8 GB
	Storage	Disk space for application, documents, and logs – 1 TB SSD
Software	Frameworks	FastAPI, Streamlit
	Libraries	python-docx, fpdf, Pillow, requests, python-dotenv, google-generativeai
	Development Environment	Python, VS Code / PyCharm
AI / API	Generative AI Model	Google Gemini 1.5 Pro
	Backend API	FastAPI with `/generate` endpoint
	Frontend	Streamlit
Data	User Input	Document type, parties, terms and effective dates
	Output Formats	TXT, DOCX, PDF
